DETAILED ACTION

Claim Objections

1. Claims 2, 7-11 and 14 objected to because of the following informalities: there is no antecedent basis for the terms “the length” (claim 2), “the one length” (claim 7), “the webs of the spacers” (claims 14) and “the one direction” (claim 14). Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claims 11 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of these claims is unclear in view of the grammar used. For example, the phrase “the holder comprises three pairs might be provided the holder” (claim 11) is meaningless. Likewise the phrase “comprising six sides defined by the interconnecting member by a respective web ... into a hollow of the shell” (claim 15) is meaningless and indefinite in scope.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 7-10, 12 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tavshanjian 5,288,534. The product in the reference comprises spacers 13, 14 spaced apart by web 10; see Figures 1 and 3.

5. Claims 1-10 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Mayer 4,774,793. The product in the reference comprises spacers connected by a thin web of material 41, 41a; see Figure 3A. The product meets the claimed size limitations because the indentations are about 1/8 inch deep on each side of the spacers. Therefore, from the Figure, it is clear that the width of the indentations (or connecting web) would be within the claimed ranges.
